## DETAILED ACTION

### *Election/Restrictions*

Applicant's election without traverse of group I in Paper No. 3 is acknowledged. In addition, further restriction is also deemed necessary.

This application contains claims directed to the following patentably distinct species of the claimed invention: a first embodiment directed to a low tunnel barrier intergate insulator comprising a metal oxide insulator, a second embodiment directed to a low tunnel barrier intergate insulator comprising a transition metal oxide, and a third embodiment directed to a low tunnel barrier intergate insulator comprising a perovskite oxide tunnel barrier. These embodiments are also defined by implementing the aforementioned tunnel barrier in the embodiment of Figure 2 or the embodiment of Figure 3. **Therefore, both the barrier material and device Figure need to be selected and with that the claims that read on both of these features.**

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2812

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Richard A. Booth whose telephone number is 308-3446. The examiner can normally be reached on Monday-Thursday from 7:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Niebling can be reached on 308-3325. The fax phone numbers for the organization where this application or proceeding is assigned are 308-7724 for regular communications and 308-7724 for After Final communications.
